

Instructions after Prostate Biopsy

You may experience discomfort/throbbing in the penis and/or rectum. Take Tylenol as needed

You may resume blood thinners once the bleeding in the urine and rectum have subsided.

You may have blood in the urine and rectum for up to 1 week

Blood in the semen may persist for a longer duration (greater than one month)

Finish your antibiotics as prescribed

Contact our office if you experience the following symptoms:

1. Fever greater than 101 F
2. Chills
3. Uncontrolled or persistent abdominal pain or discomfort while urinating
4. Inability to urinate
